Huon Valley
2020 Community Plan
Vision Statement

From Sleeping Beauty to the Southern Ocean
Prosperous, vibrant communities in the Huon Valley
Live, work and learn together
Enjoying beautiful rural landscapes, waterways and a healthy natural environment

Values Statement

In all our dealings we will:

• Be open, fair and honest
• Respect our people, land and future
• Embrace diversity and new ideas
• Pursue community cohesion

Celebrating our arts, heritage and culture

There are many places throughout the Valley that are significant to our heritage and cultural identity. These need to be recognised and protected to ensure future generations have the opportunities of insight and empathy with the past to guide and inform the present.

Communities with a strong sense of who they are, who they were and who they might be are rich in social and cultural capital. Telling the stories of the Valley and its people builds understanding and connection. Supporting, promoting and celebrating the Valley’s heritage, arts, artists and artisans will also enhance community life. The Valley’s many halls, parks and open spaces play a vital role in supporting events and celebrations.

Expanded community consultation and involvement

Good relationships are built on trust. Trust is a product of consistent, reliable and competent behaviours. Trust is needed between residents and Council for a community to function well.

Communication and consultation processes must provide a variety of avenues for Council to talk and listen to the community and the community to talk and listen to Council.

This is the way to ensure boundaries and roles are understood, information exchange is timely, and trusting relationships are built.

</table>

Message From The Mayor

I welcome and applaud the community’s participation in the development of the Huon Valley 2020 Community Plan - it is an achievement well worth celebrating.

Huon Valley residents have described the future they would like to achieve for their community, with many objectives and strategies having been identified. The next critical step, and a significant commitment for the Council and the community, is implementation. With community cooperation and engagement this can be achieved.

Future Council Strategic Plans will encapsulate many of the identified objectives of the Community Plan.

I encourage all community partners to use the Huon Valley 2020 Community Plan in their own planning and to strive to achieve the identified community vision.

It is the Community’s Plan so let’s all work together to turn the vision into a reality.

Cr Robert Armstrong - Mayor

Future Directions and Strategic Objectives

There are eight future directions that group the strategic objectives for the Huon Valley:

- Care for our environment
- Build health and well being
- Enhance recreational opportunities
- Improve transport and communication
- Create diverse educational opportunities for all
- Develop prosperity
- Expanded community consultation and involvement
- Celebrating our arts, heritage and culture
## Care for our environment

The natural environment, waterways, wilderness areas and rural landscapes are integral to life and living in the Huon Valley. Promoting environmental values and understanding will help the whole community take responsibility for keeping the air and water clean, the Valley clear of weeds and litter. A forested skyline will help keep the special ‘look’ of the Valley and everyone can play a role in helping to reduce their carbon footprint. If we each tread a little lighter on the earth’s finite resources then together we will make a big impact on the Valley’s carbon emissions and energy use.

• Community  
• Landcare | • Provider  
• Facilitator  
• Advocate | • Mapping of landscape values  
• Mapping of habitat values  
• Bushland management education |

## Develop Prosperity

The Huon Valley’s economic foundation is built on its diverse and rich natural resources. Agriculture, forestry, aquaculture and tourism are all supported by the natural environment. This is a strong and dynamic base that can be strengthened and enhanced through the development and promotion of a Huon Valley brand. The brand should give representation to the characteristics and values of the people, the place and its produce which will in turn assist tourism to grow yield and length of stay around the benefits offered by these attributes.

Sustainability is an attitude and a way of doing things. It should guide and inform economic activity and further development.

<table>
<thead>
<tr>
<th>Strategic Objective</th>
<th>Who needs to be involved</th>
<th>Council’s role</th>
<th>Measures</th>
</tr>
</thead>
</table>
| Develop a place brand/ lifestyle | • Council  
• Community  
• State Government | • Provider  
• Facilitator  
• Advocate | • Establishment and recognition of the brand/survey |
| Maximise yield from Tourism | • Council  
• Industry  
• State Government | • Provider  
• Facilitator  
• Advocate | • Data on visitor numbers, length of stay, tourism jobs  
• Attraction of development  
• Completion of strategy  
• Data on jobs growth, economic activity  
• Turnover of major industry  
• Growth in wealth |

• Industry  
• State Government | • Provider  
• Facilitator  
• Advocate | • Food Industry  
• Brand Tasmania |
| Develop and promote a Huon Valley produce and food brand for agriculture, aquaculture, tourism and local producers | • Food Industry  
• Brand Tasmania | • Provider  
• Facilitator  
• Advocate | • Export opportunities  
• Jobs growth in food and tourism sector  
• External awareness  
• Community buy in |
| Plan future population and growth to maintain the economic and social sustainability of our communities | • Council  
• State Government  
• Community  
• Industry  
• Service providers | • Provider  
• Facilitator  
• Advocate | • Population statistics  
• Approval statistics |
Create diverse educational opportunities for all

Education and learning underpins a community’s ability to reach potential, manage change and respond to opportunities. Valuing and participating in education and learning should be promoted and encouraged from early childhood throughout a lifetime.

Developing partnerships to deliver engaging programs means education and learning will be accessible to all. In particular all stakeholders need to work together to ensure young people in the Valley have the opportunity of achieving college education standard while continuing to live in the Valley where they are supported by family, friends and the community.

<table>

</table>

Build health and well being

To meet the challenges of modern living a community must be fit and healthy. Promoting an active and healthy lifestyle supported by medical and allied health services will help meet these demands. As the Valley’s population ages and others discover its natural appeal and benefits, the provision of appropriate care and housing will become an increasing priority. Meeting these demands will mean working together to find innovative solutions.

<table>

</table>
### Enhance Recreational Opportunities

Providing open spaces as well as diverse recreational and sporting activities around the Valley's natural and social strengths will meet the needs of changing community demographics.

Maintaining and further enhancing the areas strong sporting heritage is integral to a fit, healthy and happy community. It is important to develop social capital and explore innovative ways to organise and support sporting and recreational clubs and their endeavours.

Developing a system of multi-use tracks and trails has the potential to provide cultural and recreational activities for those who live in the Valley and those who love to visit. Access to the rivers of the Valley will also open up recreational possibilities on, in and beside the water. Interpretation will enhance the tracks, trails and rivers experience helping to build a strong sense of place.

<table>

### Improved Transport & Communication

There are two types of highways that facilitate service delivery and distribution.

The Valley’s highway and road network needs to be upgraded to increase capacity and ensure the safety of motorists and pedestrians. Improved public transport will also ease the stress and demand on our road system’s further development and maintenance.

The information highway enables communication and network building. Speedy, reliable access to the World Wide Web is essential if the Valley and its communities are to be connected to each other and the rest of the world.

Message From The Mayor

I welcome and applaud the community’s participation in the development of the Huon Valley 2020 Community Plan - it is an achievement well worth celebrating.

Huon Valley residents have described the future they would like to achieve for their community, with many objectives and strategies having been identified. The next critical step, and a significant commitment for the Council and the community, is implementation. With community cooperation and engagement this can be achieved.

Future Council Strategic Plans will encapsulate many of the identified objectives of the Community Plan.

I encourage all community partners to use the Huon Valley 2020 Community Plan in their own planning and to strive to achieve the identified community vision.

It is the Community’s Plan so let’s all work together to turn the vision into a reality.

Cr Robert Armstrong - Mayor

Future Directions and Strategic Objectives

There are eight future directions that group the strategic objectives for the Huon Valley:

- Care for our environment
- Build health and well being
- Enhance recreational opportunities
- Improve transport and communication
- Create diverse educational opportunities for all
- Develop prosperity
- Expanded community consultation and involvement
- Celebrating our arts, heritage and culture
Vision Statement

From Sleeping Beauty to the Southern Ocean
Prosperous, vibrant communities in the Huon Valley
Live, work and learn together
Enjoying beautiful rural landscapes, waterways and a healthy natural environment

Values Statement

In all our dealings we will:
• Be open, fair and honest
• Respect our people, land and future
• Embrace diversity and new ideas
• Pursue community cohesion

Celebrating our arts, heritage and culture

There are many places throughout the Valley that are significant to our heritage and cultural identity. These need to be recognised and protected to ensure future generations have the opportunities of insight and empathy with the past to guide and inform the present.

Communities with a strong sense of who they are, who they were and who they might be are rich in social and cultural capital. Telling the stories of the Valley and its people builds understanding and connection. Supporting, promoting and celebrating the Valley’s heritage, arts, artists and artisans will also enhance community life. The Valley’s many halls, parks and open spaces play a vital role in supporting events and celebrations.
